

ENVIRONMENTAL POLICY

Tri Underground is committed to achieving and demonstrating sound environmental performance by controlling the impacts of our operations, processes, products and services on the environment.

The scope of the environmental management system encompasses Tri Undergrounds operations; relating to the manufacturing process of bends, fittings, pits and underground concrete products within the Narangba site.

We are committed to continual improvement of our environmental management systems and practices, as well as avoid, reduce and control pollution. Tri Undergrounds environmental management system continual improvement initiative is implemented in the management review & use of the CAPA Register.

Tri Underground is committed to complying with the Environmental Protection Act 1994 (EP Act) and all associated and other requirements. Tri Underground's environmental management intentions sets the framework for reviewing environmental objectives and targets, outlined in the management review.

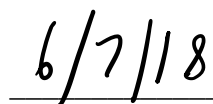

Our environmental policy is expressed to all our employees via induction and refresher training and is available to the public via Tri Undergrounds Website.

Environmental Management Intentions

- To mitigate negative environmental impacts associated with the operation of Tri Undergrounds business activities.
- To continually improve, develop and implement processes to ensure positive environmental performance outcomes.
- To comply with all relevant statutory regulation and associated requirements in regard to environmental management.
